

UCLA Research Opportunity for Children with

CHRONIC TICS OR TOURETTE SYNDROME

Do you have a child 9 - 14 who can't control movements such as

- *Eye blinking*
- *Facial grimaces*
- *Arm or leg twitches*

Does he or she make sounds such as

- *Throat clearing*
- *Sniffling*
- *Grunting*

If so, your child may be eligible to participate in a
UCLA research study

Study involves

- 2-3 visits
- Medical and psychological evaluations
- Brain scan (MRI)

Participants may be eligible for additional
non-medication treatment studies

For more information call UCLA at

310-825-0122
